Shopping Cart For Your Online Store

Online Store + Shopping Cart

Shopping Cart is here for your online store! Now you'll be able to sell multiple items in a single transaction.

New Features To Customize Your Online Store:

ADD SALES TAX

Add a sales tax percentage to each different item in your Online Store.
ADD VARIOUS SHIPPING OPTIONS + SET MAX SHIPPING

Give your supporters various shipping options to choose from and set the price per shipping option. Some examples of shipping methods include speed of shipping and where you are shipping to. Since shipping costs can add up, you can cap the shipping cost of an entire order by setting a max shipping cost for the entire order.

SET ESTIMATED DELIVERY DATE

Let your supporters know when they should expect to receive their item by adding estimated delivery dates.
ADD COUPON CODES

Create coupon codes to share with your supporters. Coupon codes can be created to apply to an entire order or to a specific item(s).
If you set a coupon code for a specific item, the coupon code will only work when that item is in the cart. Here is an example of a 10% off backpacks coupon code.

20% discount code applied to the entire order

If you set a coupon code for a specific item, the coupon code will only work when that item is in the cart. Here is an example of a 10% off backpacks coupon code.
ADD CUSTOM FIELDS

Have a specific question you need to ask your supporter based on what they purchase? Add a custom field to each item type. Here is an example of offering a free name embroidery on a backpack. In this example my supporter is purchasing 2 backpacks, so they will be asked 2 times what name they would like embroidered onto the backpack.
SET TAX-DEDUCTIBLE STATUS

Set the tax-deductible status of each item type. Choose between Not Tax-Deductible, Percentage Tax-Deductible, or Set Market Value.
