You can create and store waivers for your organization in the Campaigns > Waivers section of your Flipcause Dashboard.

There is no limit to how many waivers you can create, and each active waiver will be able to be inserted into a campaign, or a part of a campaign. This will allow you to have separate waivers for your events and programs and volunteer positions, all available for future editing and re-use across multiple campaigns and engagement tools on Flipcause.

Once created, you will also be able to search, edit, and archive waivers as needed from this section.
