

If you are looking to pull a report of activity from only businesses and organizations, you can do so using the "Business/Organization Name" filter. For instance, if you want to pull a Transaction Report of businesses and organizations filtered through a certain timeframe, here's how to do that:

1. Go to **Reports > Transaction & Activity**.
2. Set the "Transaction Date" filter parameter and values to select the time period.
3. Click **Add Filter**.
4. Select the filter "Business/Organization Name".
5. Set the parameter to "Is".
6. Set the value to "Yes".
7. Click **Generate Report** or scroll down and click [Custom Report](#) to customize your report.
